NUTRIMO
AGRI SCIENCE

Company Profile

Protect today. Grow tomorrow.

Who we are

Nutrimo Agri Science is an agricultural inputs company dedicated to crop nutrition and crop protection. We develop, manufacture and supply fertilizers, pesticides, bio-stimulants and organic inputs, supported by agronomy services that help farmers use them well.

Mission & vision

- Mission: To deliver research-driven crop nutrition and protection solutions that improve farm productivity and profitability while safeguarding soil, water and biodiversity.
- Vision: To be the most trusted agri-science partner for farmers — known for quality, innovation and sustainability.

Our emblem

The green leaf shield represents crop protection and care for the land. The rising sun symbolises growth, energy and a brighter future for every farming family.

Capabilities

- Formulation & manufacturing: Water-soluble fertilizers, micronutrients, liquid and granular products, and crop protection formulations.
- Quality control: Batch-wise testing of raw materials and finished products.
- Research & development: Lab, greenhouse and multi-location field trials.
- Agronomy services: Soil testing, crop advisory, demonstrations and farmer training.
- Distribution: A growing network of dealers and distributors with regional depots.

Partner with us

We welcome dealers, distributors, FPOs, institutions and research partners. Contact us at info@nutrimoagriscience.com.
