NUTRIMO
AGRI SCIENCE

Sustainability Report 2025

Growing responsibly

SAMPLE FORMAT — Update this report with your verified sustainability data and initiatives.

Our approach

At Nutrimo Agri Science, sustainability means helping farmers produce more with fewer resources, while protecting soil, water and biodiversity.

Focus areas

- Soil health: Promoting soil testing, balanced nutrition and organic and bio-inputs.
- Product stewardship: Clear labelling, farmer safety training and container management.
- Resource efficiency: Water-soluble and chelated products for fertigation and lower losses.
- Responsible operations: Energy and water efficiency, and waste reduction in manufacturing.
- People & communities: Farmer training, employee safety and rural engagement.

Key indicators

Indicator	2025	Target
Farmers trained in safe use & IPM	[value]	[target]
Soil samples tested	[value]	[target]
Share of bio / organic products in portfolio	[value]	[target]
Water use per tonne produced	[value]	[target]
Recordable workplace incidents	[value]	[target]

Looking ahead

We will continue to expand bio-solutions, strengthen stewardship programmes and report our progress transparently every year.
